El **sobrediagnòstic** és el diagnòstic d'una anormalitat que no està associada amb un risc rellevant per a la salut, el coneixement de la qual no aportarà cap benefici al pacient.

La **Barcelona International Preventing Overdiagnosis Conference** serà una excel·lent oportunitat per debatre i reflexionar sobre el sobrediagnòstic i la seva naturalesa, els potencials riscos i l'impacte en la salut de les persones i el cost d'oportunitat que pot representar per als sistemes sanitaris.
